Re: Connecticut Yankee Spent
Fuel Modifications
Job No. 2002-121

Dear Jere:

I would like you to thank you for the prompt service you provided us with for the Spent Fuel Building Modification project we did at Connecticut Yankee. It was difficult overcoming the numerous obstacles thrown at us, but thanks to the performance of Tony and Charlie, the electrical work went as smoothly as it could in the work environment we were subject to. Your men could be counted on to perform their work without direct supervision, and did so with professionalism that lead to a quality installation. It was a pleasure to work with Tony and Charlie on this project and I appreciated all of your support in the background. We look forward to working with McPhee on future projects. Thanks again.

Very truly yours,

Stephen A. Maiorano
Vice President of Operations
