RE: Primary Electric
On Call Maintenance and Service Contract
Central Connecticut State University

Gentlemen,

On behalf of the University and myself, I would like to take this opportunity to express our thanks to McPhee Electric Ltd and specifically Mr. Erick Weiss of your office, for your continued and proactive involvement in assisting CCSU with it maintenance and control of the Primary Electric distribution on Campus.

It has been an especially trying and chaotic year for the Campus, due to the major construction of our new Energy Center and the rebuilding and re-distribution of our 13,800 KV primary electric system. Through the assistance of your offices, we have been able to maintain a seamless transition, with no major impact to the greater campus.

I should make special mention of Chip Ware's immediate response to our recent loss of power to our Stadium. Through Chip's improvisation and McPhee's ability to back him up with equipment, material and manpower, we were able to avert, what had the potential to become a disaster.

You're to be applauded for your efforts and we truly anticipate a successful upcoming year and look forward to our working together to bring our major construction projects to a successful conclusion. We also anticipate extending our relationship into the future as this Campus continues to grow and expand.

Gentlemen, thanks again for your efforts.

Sincerely

Robert M. Le Baron
Direction Of Engineering
Central Connecticut State University
