Dear Joel:

Now that we've got the most critical part of the North Plaza Generator Project behind us, I'd like to take this opportunity to thank all concerned for a job well done.

The electrical shutdown of last weekend (2/10-11) left me impressed with the organization and smoothness of the operation. All workers present at the shutdown were definitely part of the "A" Team and were a pleasure to work with. This was probably the best team effort I've ever experienced and all are to be congratulated.

As McPhce Electric had the largest work force present, Tony DiBenedetto gets our special thanks for selecting their team and organizing the operation during the shutdown.

Once again, thanks to all concerned for a job well done - it was appreciated!

Very truly yours,
CPS Engineering, Inc.Richard G. Erling
Vice President
