Fuel Cell Energy @ Pepperidge Farms

OWNER	PEPPERIDGE FARMS CORP.
Location	Bloomfield, CT
Project Value	\$220K
Completion date	July 2008
Major Challenge	Fast turn-around of relatively new, custom technology
General Contractor	FuelCell Energy, Danbury, CT

DESCRIPTION OF WORK

Complete electrical work associated with installation of a 1.2MW fuel cell. The fuel cell will supply approximately 57% of the total electrical needs of the 260,000 SQ FT plant. The project is being partially subsidized by a grant from the CT Clean Energy Fund.

The installation includes 277V/480V, 2000A switchgear back-feeding the utility. McPhee also performs work at fuel cell energy's Torrington, CT manufacturing facility on fuel cell assembly, wiring and testing prior to breakdown, packaging and shipment to installation sites worldwide.
